IPC Offers Biodegradable Cleaners and Temporary Rubber Assembly Lubricants

Burlington, New Jersey, USA: International Products Corporation (IPC) continues to remain ahead of the curve by manufacturing environmentally friendly cleaners and rubber assembly lubricants for use in manufacturing, laboratory and filter membrane applications. IPC is proud to announce that [P-80[®] Emulsion](#) and [P-80[®] THIX](#) rubber assembly lubricants are biodegradable.

According to Kathy Wyrofsky, the company's president, "Consideration for user safety and the environment are at the forefront of our R&D efforts. We aim to manufacture safe products that perform exceptionally well, and we are achieving our goal."

The company's free-rinsing cleaners provide fast-acting removal of most soils and are registered with NSF as category A1 cleaners for use in food processing areas. Their biodegradable cleaners include [Micro[®] A07](#) and their soon to be released cleaner, Micro[®] Green Clean.

International Products Corporation manufactures and distributes environmentally-friendly temporary rubber assembly lubricants and precision cleaners from their ISO 9001-Certified facility in Burlington, New Jersey. Their on-site laboratory is equipped for analytical work and consultation on assembly and cleaning processes. Products are readily available worldwide through their network of global distributors.
