## MEDIA RELEASE

December 2007

### *Aqueous Cleaners Meet USDA Standards*

---

**Burlington, New Jersey, USA:** International Products Corporation manufactures specialty cleaning concentrates designed to remove a wide variety of soils including oil, grease, chewing gum, wax, protein and starch. The environmentally friendly cleaners are now registered with NSF International for use in USDA A1 applications, such as the cleaning of food processing surfaces and equipment. The cleaners do not contain phosphates, halogens or phenols, and are non-flammable. Cleaned surfaces can be easily validated. The company's NSF-registered cleaners include: Micro-90<sup>®</sup> Alkaline Cleaning Solution, LF2100<sup>®</sup> Low-foam Alkaline Cleaner, Micro<sup>®</sup> A07 Citric Acid Cleaner, Surface-Cleanse/930<sup>®</sup> Neutral Cleaner, Zymit<sup>®</sup> Low-foam Enzyme Cleaner and Zymit<sup>®</sup> Pro Enzyme Cleaner.

In addition, IPC manufactures and distributes P-80<sup>®</sup> Temporary Assembly Lubricants, which ease assembly of rubber and plastic parts. The lubricants provide safe, temporary lubrication during assembly, and then dry to allow a tight fit. P-80 lubricants are widely use in the automotive, appliance, filter membrane, and pump industries, and are available in industrial and incidental food contact formulas.

For more information or to request a sample, contact the manufacturer at 609-386-8770 or visit their website: [www.ipcol.com](http://www.ipcol.com). IPC is an ISO-Certified Company.
