International Products Corporation Introduces P-80® RediLube Temporary Rubber Assembly Lubricant

Burlington, New Jersey, USA: International Products Corporation (IPC) is proud to add P-80® RediLube as the latest addition to their line of [temporary rubber assembly lubricants](#). P-80® RediLube provides temporary lubrication that can ease assembly of tight-fitting parts.

[P-80® RediLube](#) is designed for use on non-porous and coated rubber surfaces. It provides a high degree of lubrication but dries quickly, making it ideal for sub-assembly. Uses include installation of hoses, bushings, seals, o-rings, grommets, and grips. [P-80® RediLube](#) is biodegradable and does not contain alcohol, petroleum distillates, or silicone. It is safe to use on most natural and synthetic rubbers, metals, and plastics.

International Products Corporation manufactures and distributes environmentally-friendly temporary rubber assembly lubricants and precision cleaners from their ISO 9001-Certified facility in Burlington, New Jersey. Their on-site laboratory is equipped for analytical work and consultation on assembly and cleaning processes. Products are readily available worldwide through their network of global distributors.
