Attention: International Products Corporation Customer

Dear Customer:

Thank you for your request regarding our environmental policies. We recognize the value of implementing procedures that promote a sustained, unadulterated environment. As such, International Products Corporation strives to maintain this philosophy by upholding the following policies:

1. Keep abreast of the ever-changing toxicological profiles of raw material ingredients, including SVHC ingredients, and respond accordingly.
2. Evaluate all products for health and safety concerns using independent, accredited toxicological laboratories.
3. Provide GHS-compliant Safety Data Sheets and labels.
4. Recycle all appropriate wastes.
5. Maintain a **zero** discharge policy for all manufacturing processes, including water, volatiles, and solid waste.
6. Avoid the use of VOC ingredients.
7. Continue in-house training to avoid lost-time accidents (currently 10+ years).
8. Participate in industrial and regulatory associations to maintain a level of preparedness for any new environmental developments.
9. Formulate products, when as sold, are not classified as hazardous waste.
10. Strive to use materials with a comprehensive risk assessment analysis, such as those Generally Recognized as Safe (GRAS) and fully biodegradable.

While we have not pursued formal ISO14001 registration, we believe our policies ensure that International Products leaves no carbon footprint in its everyday business activities.

International Products Corporation is ISO9001:2008 certified, registered with Lloyds Register Quality Assurance, Ltd. Enclosed is a copy of our current certification.

Thank you again for your interest in International Products Corporation's environmental policy and practices. If you have any questions, please call me at (609) 386-8770.

Sincerely,

Thomas P. McGuckin  
VP, Research, Quality & Safety

Cc: K. Wyrofsky – President, International Products
